Re: Reference Letter for Derek Lidstone

To Whom It May Concern:

It was my pleasure to teach Mr. Lidstone in a course last summer (2005) at the University of Lethbridge as he was completing his requirements for his Bachelor of Education. The course he took was Education 3700, Math for Non-Majors.

I was extremely impressed with Mr. Lidstone's performance in this class. I would rank him as being in the top 5% (perhaps in the top 1%) of students who have taken this course. His assignments and work were always of the highest caliber, professional and polished in every way. I understand that Mr. Lidstone is an Art major, and his ability to merge Art and Math through creative activity was clearly exceptional and speaks well of his future potential as a teacher.

The students in this class give a class presentation as one of their culminating and major assignments. I was very impressed with Mr. Lidstone's strong class presence and his awareness of the class. Clearly teaching comes easily to him and he is "a natural" in front of his students.

I have no hesitation in recommending Mr. Lidstone to you as an outstanding teaching candidate.

Sincerely,

Faculty of Education.
