

5.2 LEADERSHIP SKILLS

In December of 2004 I successfully completed Mount Royal College's Certification Course for Project Management. This discipline focuses on the tools and techniques for initiating, planning, executing, controlling and closing the nine project management processes:

- integration,
- scope,
- time,
- cost,
- quality,
- human resources,
- communication,
- risk
- procurement.

These are powerful resources for organization and leadership. I see teachers as project managers: their classes are unique, time-relevant "projects" to be efficiently orchestrated to successful conclusions.
